

Dear Parents,

Over the course of the past school year, we have identified the need for the students to strengthen their knowledge of the multiplication tables. In order to help with that I have made some changes to the summer math packet. In the packet you will find eight groups of three worksheets paperclipped together. All of the worksheets contain 100 multiplication problems from the 0 - 12 multiplication tables.

What I am asking is that three times a week for eight weeks of the summer the students are to be timed while doing these worksheets. They are to complete as many of the problems as they can in one minute. Once the minute is up they should check how many are done correctly and put the score in the upper righthand corner under their name.

The goal of this exercise is to be able to complete all 100 problems in a minute by the end of the summer. This will be graded on completion rate of the exercise and not how many correct answers they turn in on the first day of school. Improving in anything in life be it a sport, playing an instrument or painting requires practice. That is why I am asking that this be done over eight weeks. Trying to do all twenty four worksheets the week before school starts defeats the purpose of doing this so your help and cooperation in doing this is greatly appreciated. If you have any questions please let me know.

Thank you,  
Mr. Antico
